

## Two-Way Communication Made Easy

Communicate Efficiently and on-the-go.  
Never be out of reach.

**PRODUCTIVITY AND SAFETY is enhanced by clear constant communication.**

LRS Digital and LRS Analogue radios provide a convenient, fast, two way communication solution for all contexts, particularly where public safety and employee safety are at risk.

Offering instant private communication, one-to-one or one-to-many call options, durability, and communication flexibility in almost any environment, LRS radios are the preferred solution across all markets - commercial, industrial, security, military and government.

### LRS Digital Radio

LRS Digital Radios have many features that offer secure communication with crystal clear audio.

From emergency situations to everyday operations, LRS Digital Radios are a long-range communication solution for every situation.

### LRS Analogue Radio

Industrial strength LRS Analogue Radios provide a simple and reliable method of communication.

As one of the first two-way radio communication solutions available in the marketplace, the analogue radio remains a popular choice.

# Paging Systems

Forklift & Truck/Warehouse, Pronto, Netpage

LRSAUSTRALIA.COM.AU

## Paging Solutions for All Industries

### Forklift & Truck/Warehouse Paging

The Forklift Pager is a simple messaging system made to streamline communication to workers in noisy environments.

This durable 24V pager is mounted to forklifts and flashes brightly when messages are received. Easily provide clear instructions and feel confident knowing that messages have been delivered.

### Features and Benefits

- Improve warehouse productivity
- Increase staff responsiveness
- Boost staff productivity
- Provides more effective communication
- Hardwired
- Simple implementation and easy to use

### Push for Service - Pronto

LRS compact push button paging systems dramatically improve staff response and emergency response times, and increase productivity by improving communication.

Unlike other push button paging systems, LRS wireless transmitters can be placed anywhere you need them: on top of the desk, mounted to the wall or even under a desk to discreetly page someone.

### Features and Benefits

- Battery operated or AC powered
- Wall mountable
- Repage feature sends multiple messages until cleared
- Scalable - add additional units at any time
- Customised Messaging
- One or six button options
- Multiple or group paging available

### PC Communication & Paging System

LRS brings You Netpage unlimited - the premier, browser-based, wireless communication solution that provides any organisation or industry of any size with superior, scalable and unlimited communication capabilities.

Your organisation will be able to communicate via:

- Onsite paging with unlimited range
- SMS text messaging
- Email notifications
